

HEALTH AND SOCIAL CARE – CURRICULUM INTENT

ASPIRE – CHALLENGE – ACHIEVE

Studying Health and Social Care offers students the opportunity to explore a wide variety of topics that underpin the skills and qualities needed for a multitude of future careers. Our Level 1, 2 and 3 courses allow students to acquire the skills, knowledge and interdependence required to work in this industry and provide the best possible care for people under their supervision, whether this be a midwife, nurse, paramedic, speech and language therapist or social worker to name but a few.

For various reasons and at different stages in their lives, some people need support to develop and maintain their independence, dignity and control. Studying Health and Social Care teaches our students about providing physical, emotional and social support to help people live their lives. In this subject students will be academically challenged through the broadness of the curriculum and the wide range of real life scenarios that they will face which prepares students for their life beyond school.

Our courses offer a clear assessment and intervention programme where our students are encouraged to independently strive to achieve their full potential. The course is tailored to build resilience and empathy skills by analysing real life situations. Not only does our course in Health and Social Care make our students academically equipped through developing literacy but also focuses on their wellbeing through preparing them emotionally and psychologically by building their confidence, self-esteem and beliefs in their own abilities.
