

Safety equipment for School PE

Boots for Football and Rugby (Compulsory)

Students at Bourne academy require boots for some PE lessons, as they will be taking part in Football and Rugby on the field. Obviously, we only expect each student to have one pair of boots but with so many different types and styles here is some quick advice about what type of boot to buy.

Soft ground

These boots usually have long metal studs. Ideal when it's wet.

Firm ground

These boots usually have lots of plastic studs, ideal for when ground is harder but can give some grip in the wet

AstroTurf trainers

We have had some students arrive for Football/Rugby lessons with AstroTurf trainers. These have rubber soles and **cannot be used on the field** for football/rugby. But can be used indoors and on the AstroTurf

Other safety equipment

Shin pads for Football and Hockey (Compulsory)

Gum shields/Mouth Guard for Hockey and Rugby (Highly recommended)

Will need to be moulded
